PROFESSIONAL SUMMARY

Backend Developer with 1+ year of hands-on experience in building and maintaining applications using C Sharp, ASP.NET MVC, and SQL Server. Currently contributing to the **Tata Steel Downstream Products Limited (TSDPL) E-Suraksha** project at **Anmoul Informatics**, working on backend development and database operations.

TECHNICAL SKILLS

Languages	C, SQL, HTML/CSS, Bootstrap, JavaScript
Frameworks	ASP.NET MVC, AJAX, jQuery
Databases	SQL Server (Queries, CRUD Operations)
Tools	Visual Studio, VS Code
Practices	Backend Development, Debugging, System Testing, Documentation

WORK EXPERIENCE

Junior Web Developer June 2025 – Present Anmoul Informatics, Jamshedpur

- Developing the E-Suraksha project, handling backend development and database logic using C Sharp and SQL Server.
- Implementing feature modules from requirement gathering through testing and deployment.
- Resolving user issues and providing technical support for system-related queries.
- Managing data integrity through optimized SQL queries.

Trainee Developer April 2025 – May 2025 Anmoul Informatics, Jamshedpur

- Developed the Line Walk module using C, SQL Server, AJAX, and jQuery with full CRUD functionality.
- Performed system testing and debugging before production handoff.
- Collaborated with senior developers to understand architecture and coding practices.

Software Development Intern March 2024 – January 2025 NapaSoft

- Worked on backend development tasks using C, ASP.NET MVC, and SQL Server.
- Developed database queries, form handling features, and controller logic.
- Participated in code reviews, project discussions, and daily team activities.

EDUCATION

B.Sc Information Technology 2019 – 2022 Jamshedpur Cooperative College, Kolhan University

PROJECTS

Tata Steel Downstream Products Limited (TSDPL) E-Suraksha System C, ASP.NET MVC, SQL Server

- Developed and enhanced Line Walk, SOP, Incident Management, and E-Document Management modules.
- Implemented workflow approvals, role-based access control, incident tracking, and document versioning.
- Designed SQL Server database structures and optimized queries.
- Built dynamic user interfaces using AJAX and jQuery.

Leave Management System C, ASP.NET MVC, SQL Server, AJAX

- Developed a leave application and approval system with multi-level workflow authorization.
- Implemented leave requests, approval tracking, and role management.
- Designed backend business logic and SQL Server database integration.
